ABOUT ME

I'm a front-end developer skilled in HTML, CSS/SAAS, JavaScript, and React Framework, focused on building clean, responsive, and user-friendly web applications. I enjoy leveraging tools like Tailwind CSS and optimizing performance for seamless, modern experiences. I enjoy transforming creative concepts into seamless user experiences and staying updated with the latest front-end technologies. Let's collaborate to build stunning and efficient web solutions!

WORK EXPERIENCE

Career Launched Paid Program | UET Mardan – Mardan, Pakistan

City: Mardan | Country: Pakistan

Front-end Developer

[15/01/2025 – Current]

- Participating in a structured, industry-aligned training program focused on building real-world web applications.
- Developing responsive and dynamic UIs using **HTML, CSS\SAAS, Tailwind, JavaScript, and React Framework**.
- Strengthening skills in **component-based architecture, state management, and API integration**.
- Collaborating on projects in a simulated professional environment, following best practices in version control, clean code, and UI/UX.
- Gaining practical exposure to frontend tooling, performance optimization, and modern development workflows.

Front-End Developer (Project-Based Experience)

Freelance / Self-Initiated Projects

- Developed responsive and user-friendly web apps focused on functionality, performance, and UI design.
- Built a **Quiz App** in React with scoring, navigation, and session-based timers.
- Created a **Weather App** with real-time data, geolocation, and clean UI.
- Developed **CineFlex**, a movie search app with ratings, search history, and smooth animations.
- Built **EatSlip**, a restaurant ordering system with cart and order flow features.
- Designed a **Travel List App** for managing trip essentials with dynamic interactivity.
- Created the **Natour Website** using HTML and SCSS for a modern, responsive landing page.
- Implemented a **Geo Tracker App** to log and display locations using React and geolocation API.
